M S VASUNDRA

Chennai, Tamil Nadu | 8838100287 | vasundrams@gmail.com
GitHub: github.com/vasundrams-png | LinkedIn: linkedin.com/in/vasundra-subramanian

PROFILE

Computer Science and Design undergraduate with a growing foundation in programming, data analysis, and object-oriented development. Building hands-on projects using Python, data-science libraries, Streamlit, Java, and hardware integration. Interested in data science and software engineering opportunities, with a focus on learning by building practical solutions.

EDUCATION

B.E. Computer Science and Design — SRM Easwari Engineering College, Chennai *(2025–Present)*

Academic performance: Semester 1 GPA: 8.63/10 | Semester 2 GPA: 9.30/10

TECHNICAL SKILLS

Programming: Python, C, Java

Data & visualization: NumPy, pandas, Matplotlib, Seaborn, scikit-learn

App development: Streamlit, Java Swing (learning), HTML, CSS, JavaScript (learning)

Tools & concepts: Git/GitHub, VS Code, Eclipse, OOP, DSA fundamentals, data cleaning, EDA

PROJECTS

Movie Recommendation System | ***Python · pandas · scikit-learn · Streamlit***

- Developing a content-based movie recommendation application using movie metadata and credits data.
- Created a Streamlit interface and recommendation workflow using processed movie features and similarity scores.
- Worked through practical issues involving model/data file size, poster API integration, and interface styling.

Employment vs Wage Pattern Analysis | ***Python · pandas · Matplotlib · Seaborn · scikit-learn***

- Academic data-science project exploring employment counts and average wages across demographic, sector, education, and skill dimensions.
- Planned exploratory data analysis and clustering to identify patterns such as high-employment/low-wage sectors.

Smart Home Energy Optimizer | ***Java · OOP · Arduino · Sensors · LCD***

- Team project concept to monitor household conditions and support energy-aware appliance control and overload prevention.
- Working with an Arduino-based prototype using an LDR, temperature sensor, LCD, and appliance-control components; planning a Java Swing dashboard.

ADDITIONAL LEARNING & ACTIVITIES

- Hackathon / ideathon participation: explored an integrated infrastructure project-monitoring platform concept (InfraPulse AI) for early risk identification and project progress monitoring.
- Learning topics completed: AI Agents, AI Data Strategy, and Vector Fundamentals.
